

Harini Maregowda

Quality Architect | Engineering Lead | Frontend & Platform Automation

+91 7975664904 hariniultimate56@gmail.com Bengaluru [LinkedIn](#)

SUMMARY

Engineering Lead with 7+ years of experience designing scalable automation and quality architectures for large-scale product platforms. Strong background in frontend engineering (React.js), REST-based service integration, and Spring Boot microservices. Proven expertise in building Selenium-, Playwright-, TestNG-, and JUnit-based automation frameworks, integrating quality gates into CI/CD and DevOps pipelines (Jenkins, Azure DevOps, Docker, SonarQube). Skilled in defining quality governance, enabling shift-left engineering practices, and collaborating with product and development teams to deliver reliable, high-performance systems in Banking, Healthcare, and Tax domains.

WORK EXPERIENCE

- Quality Lead

Synechron Technologies Private Limited

Jun 2024 – Present
- Designed and owned quality **architecture** for mission-critical banking platforms, aligning automation, frontend validation, and CI/CD pipelines with overall system design.
 - Built and governed **Playwright-, Selenium-, TestNG-, and JUnit-**based automation frameworks using **JavaScript** and **Java**, enabling scalable end-to-end and API-level validation.
 - Integrated automation and quality gates into **CI/CD** pipelines, ensuring release readiness, stability, and faster feedback loops.
 - Partnered with frontend and backend engineers on testable architecture, component design, and **API** contracts, improving system reliability and maintainability.
 - Implemented a shift-left testing strategy that identified majority of defects during the development phase, reducing downstream remediation costs.
 - Developed** and maintained dynamic user interfaces using **React.js**, ensuring responsive design and seamless user experience across web applications.
 - Served as test expert in DevOps, integrating quality gates into CI/CD pipelines with Jenkins and Azure DevOps
 - Maintained a quality metrics dashboard providing real-time visibility into test coverage, defect trends, and release readiness.

PRECEDING EXPERIENCE

- Software Development Engineer in Test

Ernst & Young

Nov 2022 – May 2024
- Designed and implemented engineering strategies for enterprise applications, focusing on scalable automation, CI/CD integration, and high-quality delivery.
 - Developed and maintained React.js frontend components and JavaScript modules, ensuring testable architecture and performance optimization.
 - Architected automation frameworks using Selenium WebDriver, TestNG, JUnit and Serenity BDD, enabling scalable end-to-end and API validation.
 - Integrated automation pipelines into CI/CD workflows via Jenkins, ensuring continuous validation and faster release cycles.
 - Led root cause analysis and defect prevention initiatives, collaborating with development teams to improve system architecture and reliability.
 - Established Git workflows and branching strategies to support multi-team development, code versioning, and integration best practices.
 - Partnered with developers on code reviews, architectural design, and testable components, enhancing code quality and system maintainability.
- Associate Professional – Application Software Testing

Sutherland Healthcare Solutions

Aug 2020 – Nov 2022
- Executed testing strategies for HIPAA-compliant healthcare applications serving multiple medical facilities.
 - Automated critical test scenarios using Selenium and Java, while also beginning frontend development work by building and enhancing UI components with JavaScript and React.js, expanding responsibilities beyond QA into development.
 - Validated regulatory compliance, confirming applications met healthcare industry standards and government regulations.

CORE COMPETENCIES

Quality Leadership & Strategy

Quality Engineering Strategy, Engineering Governance, Technical Leadership & Mentoring, Agile/Scrum Product Delivery, Risk Analysis, Design Validation & Mitigation

Test Automation & Frameworks

Test Automation Architecture, Playwright & Selenium Automation, BDD Frameworks (Cucumber, Serenity), API Automation (REST Assured), Test Framework Design, TDD/BDD Engineering

Software Engineering & Technical Expertise

Java Application Development, JavaScript (ES6+), React.js Frontend Development, RESTful API Design & Integration, Spring Boot Microservices, CI/CD Pipeline Engineering, Jenkins Automation, Maven Build Management, Git/GitHub Version Control

Quality Assurance & Engineering Practices

Quality Engineering Practices, Automated & Manual Testing, API & Integration Testing, Backend & Service Testing, Database Validation, Defect Root Cause Analysis, Release Quality Assurance

DevOps & Integration

CI/CD Pipeline Architecture, Jenkins, AWS & Azure DevOps, SonarQube Code Quality Analysis, Docker Containerization, Cloud-Based Build & Release Pipelines, Infrastructure Validation, Continuous Testing & Integration

Senior Software Test Engineer
TEKsystems Global Service

Dec 2019 – Jul 2020

- Managed the end-to-end testing lifecycle for enterprise applications, achieving complete requirement coverage and zero post-production defects.
- Created efficient automation solutions using Selenium WebDriver and TestNG, resulting in a 50% reduction in regression testing effort.
- Optimized healthcare data systems through targeted database testing focused on preserving data quality and improving performance.

Senior Software Test Engineer
Estuate Software Private Limited

Apr 2019 – Dec 2019

- Directed quality initiatives for large CRM implementations, delivering consistent service uptime and deployment reliability.
- Engineered robust Selenium and TestNG test suites to enhance test execution speed and reliability.
- Delivered detailed manual testing across mobile and web interfaces, consistently identifying critical issues.
- Explored automation techniques with Selenium WebDriver, contributing to the team's transition toward test automation.

KEY PROJECTS

Synechron Technologies Private Limited | Jun 2024 – Present
Credit Memo Intelligence | Banking Domain
Role: Quality Lead | **Team Size:** 9 Members
Technologies: Java, Selenium, REST Assured API, IntelliJ IDEA, Jira, Postman, Serenity BDD, TestNG, Swagger, React.js

- Architected automation frameworks for critical banking workflows using Playwright and JavaScript, performing API validation with Postman, and ensuring reliability of end-to-end financial transaction processing.
- Directed frontend engineering support and quality governance, including execution reports, traceability, and audit artifacts, collaborating closely with React teams and integrating across frontend, backend, and automation in Agile delivery.

Ernst & Young | Nov 2022 – May 2024
Innovation Hive | Tax Domain (17 Months)
Role: SDET | **Team Size:** 7 Members
Technologies: Java, Selenium, REST Assured API, IntelliJ IDEA, Jira, Postman, Serenity BDD, TestNG, Swagger, React.js

- Architected a scalable automation framework for tax compliance applications, implementing BDD with Cucumber and robust API validation strategies using REST Assured.
- Collaborated on Spring Boot microservices, ensuring testable API contracts and scalable architecture..

Sutherland Healthcare Solutions | Aug 2020 – Nov 2022
Imaging Protocol Manager | Healthcare Domain (28 Months)
Role: Associate Professional – Application Software Testing| **Team Size:** 6 Members
Technologies: Java, Selenium, REST Assured API, IntelliJ IDEA, Jira, Postman, Serenity BDD, TestNG, Perforce

- Administered testing operations for healthcare imaging software, enforcing privacy regulations and optimizing processes through automation.

TEKsystems Global Services | Dec 2019 – Jul 2020
Centricity Business (CB Automation) | Healthcare Domain (30 Months)
Role: Senior Test Engineer | **Team Size:** 3 Members

EDUCATION

Master of Computer Applications (MCA)

2023

Suresh Gyan Vihar University, Jaipur

Bachelor of Science (B.Sc.)

2014

KLES, Nijalingappa College, Bangalore

CERTIFICATIONS

Salesforce Certified Administrator

| Salesforce

2020

Microsoft Certified: Azure Fundamentals

| Microsoft

2023

Microsoft Certified: Azure DevOps Solutions

| Microsoft

2024

Microsoft Certified: Azure Designing

| Microsoft

2024

ADDITIONAL INFORMATION

Languages:

English, Hindi, Kannada, Telugu, German (B1), French(A1) and Tamil

Technologies: Java, Selenium, Eclipse, Jira, Postman, Serenity BDD, TestNG, SQL

- Led a long-term healthcare automation project, implemented database testing strategies, and established comprehensive regression testing suites.

Allegis Group - Appian ACT | CRM/HRMS Domain | 8 Months

Role: Automation Specialist | **Team Size:** 3 Members

Technologies: Java, Selenium, Eclipse, Jira, Postman, Serenity BDD, TestNG

- Developed automation solutions for Appian-based CRM systems, implemented test-driven development practices, and optimized HR workflow validations.

Estuate Software Private Limited | Apr 2019 – Dec 2019

Salesforce CRM | CRM Domain | 8 Months

Role: Salesforce Test Engineer | **Team Size:** 6 Members

Technologies: Java, Selenium, Eclipse, Jira, Postman, Serenity BDD, TestNG

- Specialized in Salesforce platform testing, customized automation frameworks for CRM workflows, and validated complex business processes.
